

PTXPRESSX

Industrial Pressure Sensors

The PTXPRESSX has been designed based on the hugely popular UNIK5000 series to be an off the shelf, high accuracy, flexible pressure sensor. Ideal for many industrial and process applications, the PTXPRESSX has easily identifiable, multiple pressure ranges laser etched on the body tube.

The 316L fully welded stainless steel and Hastelloy pressure module ensures excellent media compatibility without compromising performance.

Integral electronics provide a two-wire 4 to 20 mA output proportional to applied pressure. Non-interactive zero and span controls ensure system interchangeability and ease of calibration. The PTXPRESSX incorporates developments from aerospace applications and volume manufacturing to achieve high performance. These sensors feature compact, rugged design with measurement and low cost of ownership.
